DETAILED ACTION

1. This communication is in response to amendment filed 11/27/07.

Response to Amendment

2. Independent claims 1, 10, 14, 19, 20, 21, 22 and 26 have been amended per request.
3. Claims 1-29 are pending and have been allowed.

Reasons for Allowance

4. The following is an examiner's statement of reasons for allowance:
5. The claimed inventions pertain to processing information associated with loans.
6. Independent claims 1, 10, 14, 19, 20, 21, 22 and 26 recite process comprising:

Storing loan information for one or more loans received from one or more source systems, in one or more staging tables which organize each loan into categories, establishing one or more triggers, where each trigger identifies one or more rules and then identifying one or more satisfied triggers by evaluating the loan information stored in one or more staging tables associated with one or more triggers being evaluated.

Closest Prior art of record comprises Acosta et al. (US 6,643,625) (Acosta) and Sykes et al. (EP 0919942) (Sykes). Acosta and Sykes when combined fails to teach, suggest or render obvious to one of ordinary skill in the art the process described supra.

Acosta teaches a computer-assisted method of auditing of loan portfolios and loan servicing portfolios wherein the loans are of a plurality of types by keying questions which determine compliance with a large, complex, and constantly changing set legal requirements to a set of selectable audit types. When an audit type is selected, the system uses sampling methods to select a set of loans of that type to audit and generates a checklist comprising a set of questions keyed to the particular type of audit. Acosta fails to teach or suggest the claimed process of "identifying one or more satisfied triggers by evaluating the loan information stored in the one or more staging tables associated with the one or more triggers being evaluated.

Art Unit: 3693

Sykes (EP 0919 942 2) discloses a database analysis and strategy implementation tool. While Sykes discloses triggers in the context of data warehouse, such triggers are not limited to specific tables associated with one or more triggers being evaluated as required by all independent claims.

The foregoing reasons of allowance apply to all independent claims and respective dependent claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
